2023-2024

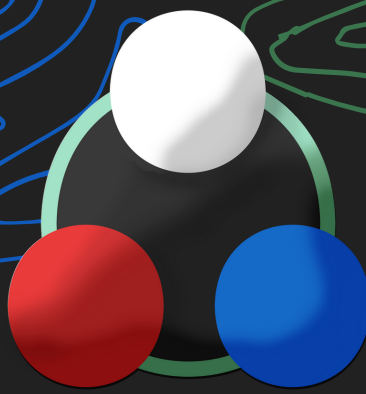

Voice HUB

I'm developing a social media application focused entirely on audio sharing. Users can share, like and comment on audio recordings in the app. I am responsible for the frontend development of this mobile application.

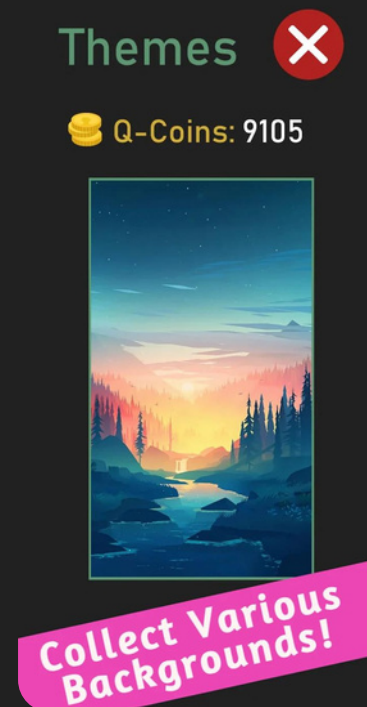

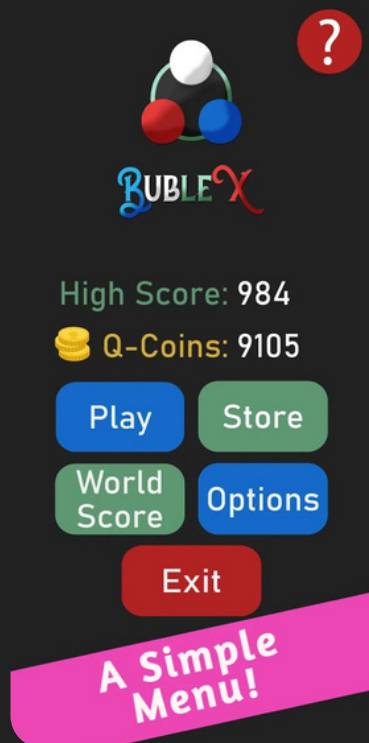

[FOR GITHUB CODES](#)

BUBLEX

As young entrepreneurs, a 2D Unity game was developed on behalf of BubleX. I worked as a freelancer on this project. The mobile game is available on Google Play Store.

MOBILE GAME ON GOOGLE PLAY

IEEE IUC – Event Mobile App

There is also a mobile application project for which I cannot specify a content image or link because it is hidden.

I also have "Facility Planning" and "Drawing statistical conclusions on transportation" projects, which I have just started to work on.

It will be accessible soon...
